

'How To' Make a 3D Planet Saturn Picture

1. The inner circle of the template will make the planet Saturn, decorate with colour and collage.
2. The outer circle will make Saturn's rings, decorate with colour and collage.
3. Fold the page in half lengthways first, then fold the page into quarters - and make sure you can see the two **solid black** curved lines when folded.
4. Cut along the two **solid black** curved lines, stop cutting at the **black dots** before the fold!
5. Unfold carefully and open the cut sections in opposite directions to make Saturn's 3D rings.

Hints and tips:

Copy the template onto thin card to strengthen it or stick onto thin card before step 3 and 4, folding and cutting. A contrasting colour card can be effective.

Reduce the overall size of the template to make a smaller picture.

Launch into Space!

An out of this world cross-curricular workshop for Key Stage 2!

Inspire Services for Schools are excited to announce the launch of their **NEW** topic based workshop using Literacy and Music.

What's included?

- 60 books, fiction and non-fiction related to the topic – loaned for one term
- Practical themed workshop
- Delivered by specialists

Learning outcomes:

- Find out lots of fascinating facts through a variety of fun, creative activities
- Children will explore the topic of Space

Why choose this workshop?

- A great way to springboard your topic
- Provides children with a good foundation of knowledge
- Inspires children to ask questions and find out more

Costs:

- Half day session for two classes, one hour each, with loan of 60 books: **£350 +VAT**
- Full day session for five classes, one hour each, with loan of 120 books: **£600+VAT**

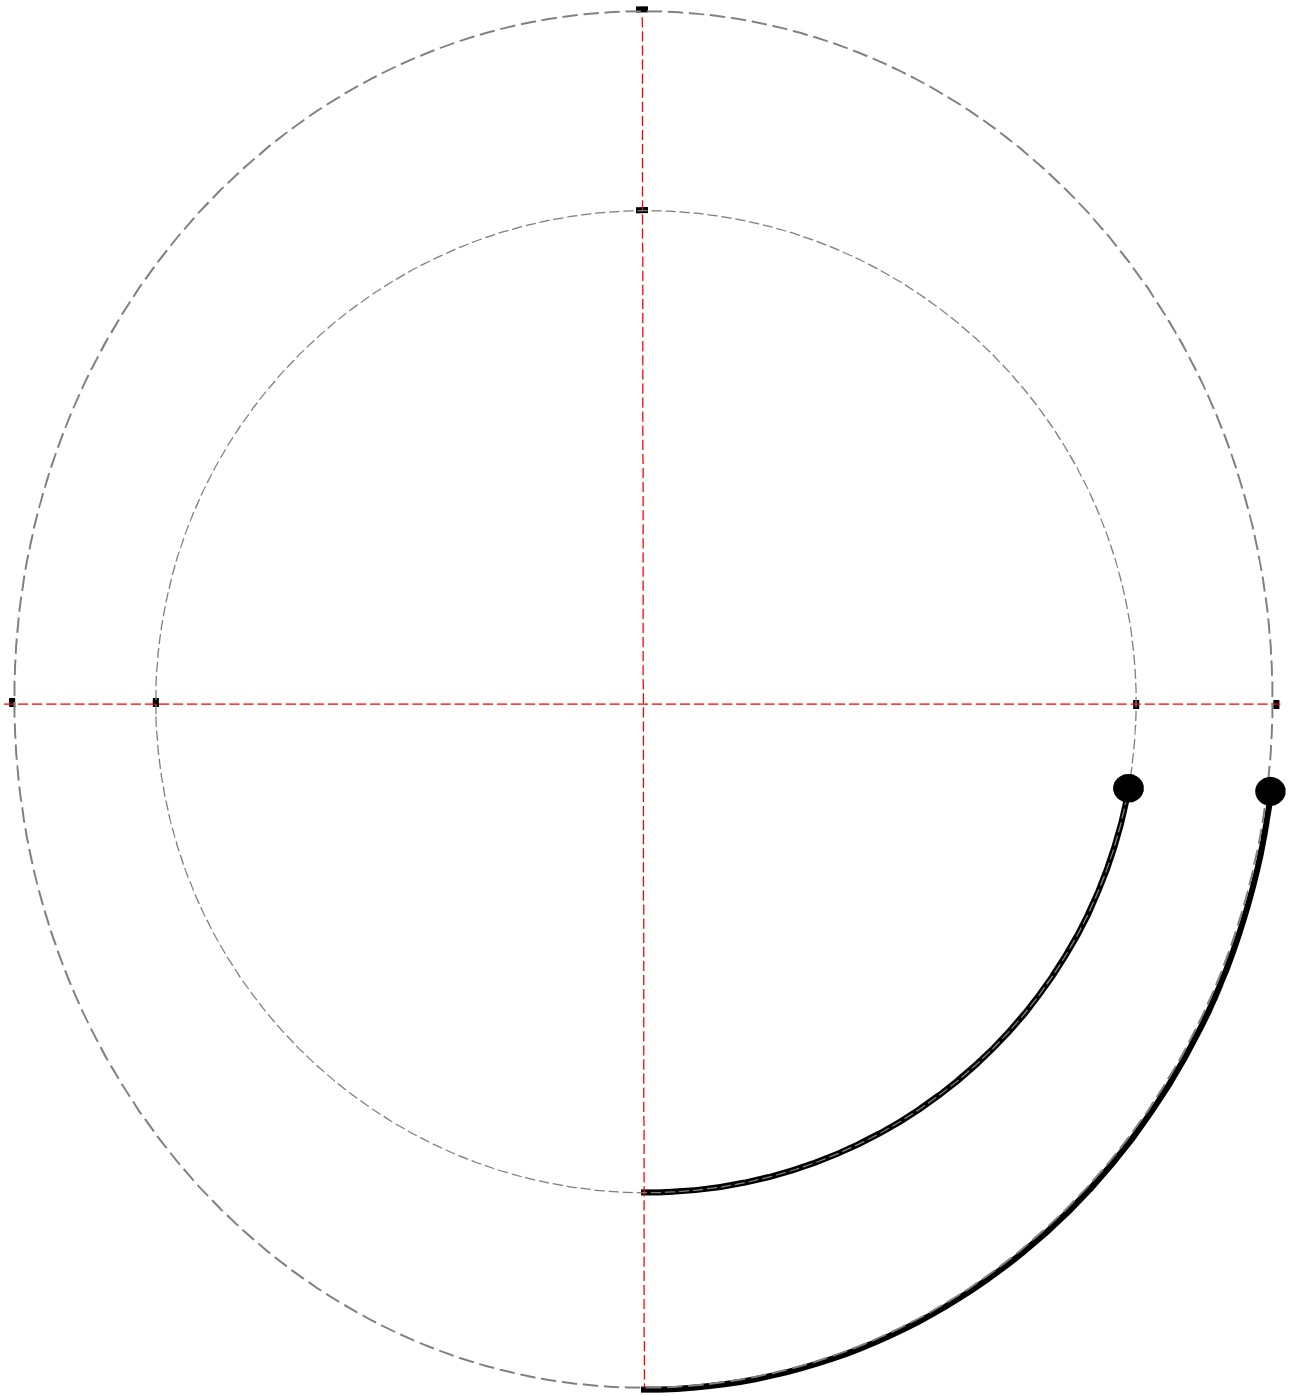

Bespoke packages available!

We're happy to work with your school to arrange a bespoke workshop to suit your chosen topic.
